WEEKLY MORBIDITY REPORT
EXPLANATORY COMMENT

This report presents each week the annual admission rates per 1000 average strength for certain communicable diseases, venereal diseases, and all causes combined (diseases, injuries and poisonings). Source material is the weekly communicable disease reports submitted to BuMed by all shore stations within the continental limits of the United States.

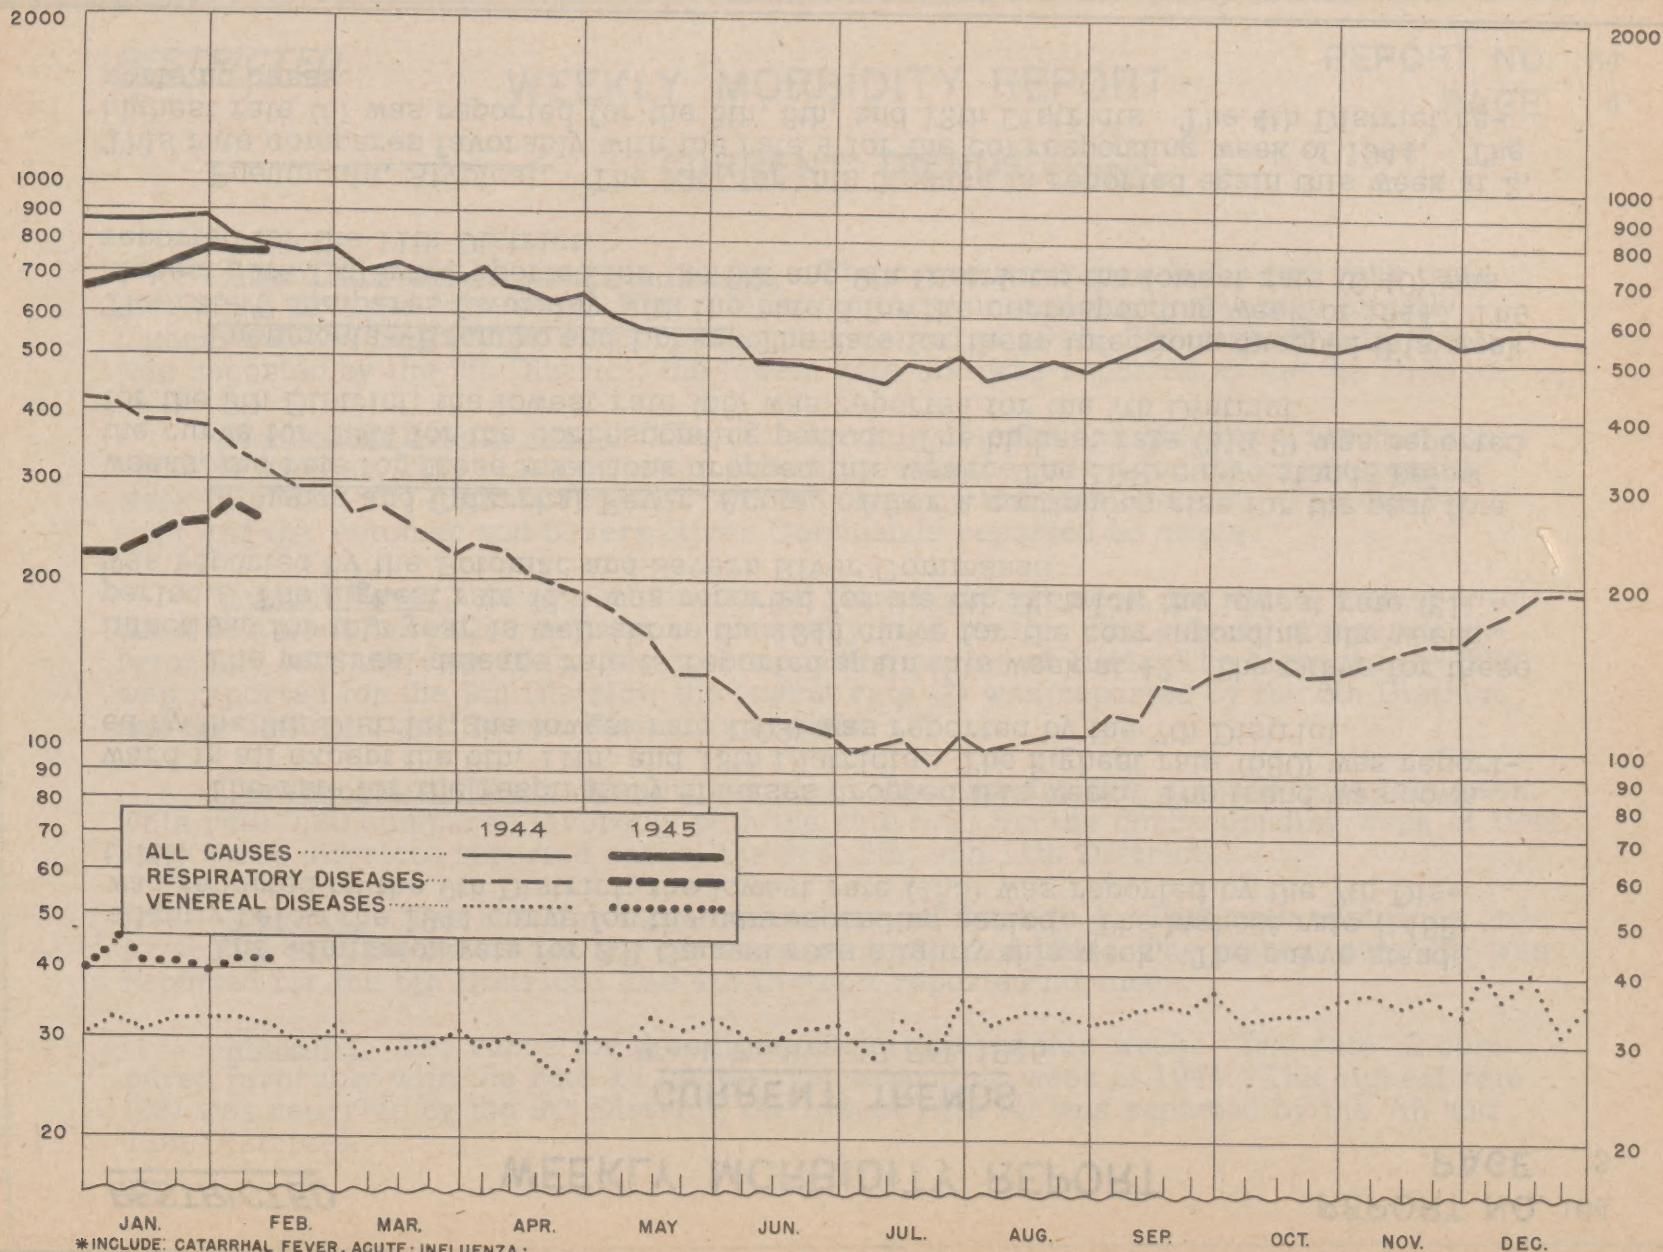

Admission rates are calculated on an annual basis to facilitate comparison with corresponding annual, quarterly or monthly figures. Such annual rates of admission indicate the number of admissions per 1000 average strength which would occur over a year's time if the current week's experience continued for a year. They are obtained as follows:

$$\frac{\text{Number of Admissions During the Week} \times 52}{\text{Average Strength for the Week}} \times 1000$$

In order to make this report promptly available the figures contained herein are presented, in general, as reported. The symbol # indicates that current data are not available. In such cases, the most recent data are utilized.

Shore stations with an average strength of 500 or more are listed individually; stations under 500 strength are grouped.

FIGURE 1
ANNUAL ADMISSION RATES PER 1,000 AVERAGE STRENGTH, BY WEEKS
FOR CERTAIN RESPIRATORY DISEASES*, VENEREAL DISEASES, & ALL CAUSES,
CONTINENTAL LIMITS OF THE UNITED STATES: 1944 & 1945

*INCLUDE: CATARRHAL FEVER, ACUTE; INFLUENZA;
PNEUMONIA-BRONCHO, LOBAR & ATYPICAL;
TONSILLITIS, ACUTE & PHARYNGITIS, ACUTE

CURRENT TRENDS

Week Ending 17 Feb 1945

The admission rate for All Causes rose slightly this week. The curve stands slightly below the 1944 curve for the corresponding period. The highest rate (1489) was reported by the 9th District; the lowest rate (455) was reported by the 7th District.

The rate for the respiratory diseases dropped this week. The trend was downward in all except the 6th, 11th, and 13th Districts. The highest rate (580) was reported by the 9th District; the lowest rate (109) was reported by the 7th District.

The venereal disease rate is reported again this week at 42. The curve for these infections for this year is well above the 1944 curve for the corresponding six weeks period. The highest rate (63) was reported for the 8th District; the lowest rate (21) was reported by the Potomac and Severn River Commands.

Influenza and Catarrhal Fever, Acute. After a continuous rise for the past five weeks, the rate for these infections dropped this week. The 1945 curve stands below the curve for 1944 for the corresponding period. The highest rate (312.2) was reported for the 9th District; the lowest rate (65) was reported for the 7th District.

Pneumonia--Broncho and Lobar. The rate for these infections dropped this week. The rate 5 compares favorably with the rate 6 for the corresponding week of 1944. The highest rate (15) was reported for the 5th and 9th Districts; the lowest rate (0.40) was reported for the 11th District.

Pneumonia, Atypical. The rate for this disease is reported again this week at 2. This rate compares favorably with the rate 4 for the corresponding week of 1944. The highest rate (5) was reported for the 5th, 6th, and 13th Districts. The 4th District reports no cases.

CURRENT TRENDS CONTD.

Tonsillitis and Pharyngitis, Acute. The curve which reached a two year peak last week, dropped this week. The rate 86 for these infections is now only slightly higher than the rate 85 for the corresponding period of 1944. The highest rate (248) was reported by the 9th District; the lowest rate (39) was reported by the 7th District.

Rheumatic Fever, Acute. The rate for this disease has stood at 2 for five consecutive weeks. This rate compares favorably with the rate 6 for the corresponding week of 1944. The highest rate (10) was reported by the 13th District. The 4th District and the Potomac and Severn River Commands reported no cases.

Scarlet Fever. After reaching an all time high last week, the curve turned downward this week but still stands at an unusually high level. The rate 40 compares unfavorably with the rate 16 for the corresponding period of 1944. The highest rate (274) was reported for the 9th District; the lowest rate (2) was reported by the 6th District and the Potomac and Severn River Commands.

Cerebrospinal Fever, Meningococcic. The rate for this disease rose this week. This rate 0.20 compares favorably with the rate 0.97 for the corresponding week of 1944. Only three districts reported cases; the 3rd, 5th, and 11th Districts.

Malaria. The rate for this disease dropped back to 4. This rate compares unfavorably with the rate 3 for the corresponding week of 1944. The highest rate (29) was reported for the 6th District. The 4th District reported no cases.

Measles. The curve for this disease was upward this week. The rate 12 compared favorably with the rate 18 for the corresponding week of 1944. The highest rate (28) was reported by the 9th District; the lowest rate (4) was reported by the 7th and 13th Districts.
